|--|--|
| National Diploma, Information and Communications Technologies in Applications Development <i>Durban University of Technology (DUT)</i> | 2019 - 2021 Durban, South Africa |
| Higher Certificate, Information Technology <i>Durban University of Technology (DUT)</i> | 2018 - 2018 |
| National Certificate, Systems Development <i>iStudent Academy</i> | 2017 - 2017 Durban, South Africa |

Professional Experience

| | |
|--|---|
| Bidvest Electrical <i>Junior Full-Stack Web Developer</i> <u>Updating & maintaining a plethora of e-commerce websites</u> | 2022 - present Johannesburg, South Africa |
| <ul style="list-style-type: none">- Managed and maintained e-commerce websites, ensuring adherence to client specifications and delivering seamless user experiences.- Implemented new features and functionalities on WordPress CMS platforms, tailoring solutions to meet evolving business needs.- Collaborated closely with clients to understand requirements, provide technical support, and implement updates, fostering long-term client satisfaction and loyalty. | |

Creation of web-based software solutions

- Created customised web-based software solutions from inception to deployment, aligning closely with client requirements and specifications.
- Utilised a full-stack approach, leveraging technologies like ReactJS, AngularJS, Node.js, and MongoDB to create robust and scalable applications.
- Implemented serverless architecture using frameworks like the Serverless Framework, ensuring efficient resource utilization and cost-effectiveness.
- Established seamless communication between front-end and back-end systems through REST APIs, thoroughly testing functionality using tools like Postman, and maintaining version control with Git/GitHub for streamlined collaboration and deployment.
- Deployed full-stack web applications and APIs using AWS services such as S3 for storage, CloudFront for content delivery, Lambda for serverless computing, and API Gateway for API management, ensuring scalable, secure, and high-performance solutions.
- Received valuable feedback and code reviews from the senior developer, enhancing the quality and efficiency of implemented solutions while adhering to best practices and industry standards.
